VOGUE UK

TOWEL WARMERS & RADIATORS

EST | 1990

Welcome to Vogue UK – the country's leading manufacturer of heated towel warmers, designer radiators and accessories. Established in 1990 within the heart of the West Midlands, and still privately owned by its original founders, Vogue UK continues to design and create more products than any other company in this field, constantly leading the trend by combining fashion with functionality.

Everyone has their own sense of style and that's why Vogue UK has created a range of quintessential products that meet the needs of every interior design style. If you require something unique then our craftsmen can create a design to your exact brief. As Vogue UK have been creating towel warmers and designer radiators since 1990 the company has built an extensive portfolio of designs and can offer a bespoke service, ideal if you're looking to create an authentic period look or simply match an existing design.

Our seven categories of products in this brochure and on our website are sure to encompass the perfect design for you...no matter what shape, style or size you're looking for.

From contemporary to traditional

We've been at the forefront of towel rail and radiator design for 30 years. It's easy to see why.

We work with some of the UK's leading interior designers who create a range that's unlike anything else. Full of inspiration and innovative design in stunning colours and finishes, we turn heating your room into a style statement.

Plus, we know every home is unique in so many ways and we've created a range that reflects the style and personality of our homes today. From timeless classics, expertly engineered for modern life, to cutting edge contemporary design that gives you a glimpse of the future - whatever your style, you'll find the perfect one for you.

*Fashion and
functionality,
beautifully crafted*

Contemporary	10 - 65
Ladder Rails	66 - 83
Traditional	84 - 117

Electric	140 - 147
Additions	148 - 157
Bespoke Service	158 - 160

BE SPOKE

| Designed around you

We know one size, one colour or even one style doesn't fit all. It's why we offer three levels of our bespoke design and manufacture service.

Customise our collection

If you like what you see, but it doesn't fit your exact requirements, no problem. You can customise your towel rail or radiator dimensions, materials and finishes.

See your design come to life

We can work from any design specification and handcraft special products from high-quality brass, stainless steel or mild steel. We will offer expert advice to ensure your design not only looks amazing, but performs too.

Bespoke Colours

From bright bold gloss colours to soft, relaxing muted tones. Shimmering metallic finishes to hardwearing crackle paints, we have the right colour for your home.

Page 158

Joints

When creating a stylish towel rail or radiator the joint details can make all the difference. We have 15 different designs to choose from, all expertly handcrafted by us.

Page 160

Fully commissioned project work with our team of designers and engineers in this collaborative design process to create exactly what you are looking for. We'll bring your vision to life and manufacture your bespoke towel rail or radiator.

*Designs are created
with care, precision
and passion*

Valves & Accessories

From simple and stylish to ornate, time-honoured designs, we have a range of valves & accessories that add the perfect finishing touch to your creation

Pages 154 - 157

Tubing

Simple, smooth and round to hexagonal and embellished options. We have lots of styles to choose from. So, pick your tubing and put your individual stamp on your design.

VOGUE UK

TOWEL WARMERS & RADIATORS

The evolution of the heated towel warmer stretches way back into the 1800's. In 1834 a man named Denison Olmstead of New Haven, Connecticut created a heat exchanger for his stove which he described as a 'peculiar kind of apparatus, which I call a radiator'. However, it wasn't until 1855, Franz San Galli of St. Petersburg invented the heating radiator.

So the journey began... the radiator became more popular and spread to every room in the home. Once heating reached the bathroom it became unrealistic for towels to dry and pile-up on the radiator and so, the inevitable arrival of the towel warmer came to pass.

The 1920's saw the first of the cast iron water heated towel warmers, commonly referred to as a 'bath radiator'. Here in the UK, drying racks, heated towel warmers and heated towel bars were seen as luxury items and would only ever be found in homes and hotels of high upstanding social status.

As time passed, new materials became available and our abilities to manipulate and manufacture these materials grew. Materials such as copper, brass, mild steel and stainless steel helped to propel the industry forward.

Arriving in the present day and now we have yet more advancement brought to you by Vogue UK, who for 30 years has been manufacturing and innovating many styles and designs into the towel warmer arena.

Brass Manufacture

BR

DZR Brass
The highest quality brass available in a finish of your choice.
Corrosion resistant and provides a superior plated finish.

H

Heating and Hot Water
Suitable for all heating and hot water systems.

Stainless Steel Manufacture

SS

Stainless Steel
Giving an easy to clean finish that is resistant to corrosion
and has a high heat output.

H

Heating and Hot Water
Suitable for all heating and hot water systems.

Mild Steel Manufacture

MS

Mild Steel
Quality mild steel available in chrome and painted finishes
suitable for indirect/closed heating systems.

C

Heating Only
Suitable for closed indirect heating systems.

Aluminium Manufacture

AL

Aluminium
Providing a quick heat up time thus allowing for greater
efficiency with a low water content.

H

Heating and Hot Water
Suitable for all heating and hot water systems.

Additional Requirements

E

Electric Only
Can be specified where this symbol is
displayed. Please see page 152 for full
range and price supplements.

DL

Electric Dryline
Can be specified where this symbol is
displayed. Dryline technology, heating via
a heater cable. POA

D

Heating and Electric
Can be specified where this symbol is
displayed. Please see page 152 for full
range and price supplements.

RAL Colours
Available in RAL colour Chart options.
Please see page 158 for colour options
and price supplement.

Stock Information

Stocked Item
The 'Tick' symbol in the product
specification tables denotes a stocked
item.

Additional Production Process
The 'Stopwatch' denotes a stocked item
that under goes additional production
processes to achieve chosen finish.

Made-to-order
The 'Handprint' symbol in the product
specification tables denotes a made to
order product.

Vivid Integral Valve

Wall Mounted IVCN021

Vivid IV has all the stunning looks of Vivid with the added feature of built in integral valves. Manufactured from high quality brass with a chrome mirror finish.

Prices shown are for chrome heating and hot water systems. This radiator is also available on previous page with standard valves. Please see pages 158 & 159 for finishes and colour options. Pipe work is hidden in the wall. We recommend using service valves as part of the installation. Please consult your installer for the suitability of a brick wall installation.

Comby

Wall Mounted MD052

Comby is designed to provide completely adaptable towel hanging and storage space. Towels in use can be hung over the cross rails to dry, clean towels placed on the folding shelf. Chromed to a mirror or white painted finish. Prices shown are for central heating models.

The Comby is designed for efficient heating of your towels and will provide maximum heat output with the shelf in the open position (as illustrated). In the closed (down) position heating of the shelf is reduced.

Mode

Wall or Floor Mounted

Mode suits traditional properties, yet also looks great in contemporary settings.

Available in a wide range of sizes, so you can choose a radiator which exactly suits your space and required heat output. The standard colour finish is white RAL 9016. Other RAL colours are available. Please see page 150 for other colour options. Subject to manufacturing tolerances.

Please note, contemporary colours available on 2, 3 & 4 column only.

Wall brackets are included, feet and other fixing accessories are detailed on the next pages. For valve options see page 156

Standard Stock Sizes (opposite)

We stock 2, 3 and 4 column radiators. Heights range from 300mm great for under window sills, to a 1800mm tall version. There are many sizes in between.

Non Standard Sizes (next pages)

Non standard sizes include 5 and 6 columns ranging from 300mm - 2000mm high and detailed on the next pages. Non stocked and colour finish options have an eight week lead time.

VL004 Arne Thermostatic option

VL008

Mode

Bespoke

This service gives the opportunity to order non standard sizes. Choose from wall or floor standing. These radiators are supplied in white RAL 9016. Coloured finishes are available, please see page 158 for colour options. Please note, contemporary colours available on 2, 3 & 4 column only. The lead time for delivery is approximately eight weeks. The sections cannot be joined on site. We only supply complete radiators, practical considerations need to be given to weight, carriage, handling and accessibility. Where necessary large radiators can be supplied in module format. Contact our sales office for further information.

VL003 For valve options see page 156

Accessories for Mode Column Radiators	Price (ex VAT)	Price (inc VAT)	Stock or made to order	Calculations for Sizing a Radiator
	90.00 per pair	108.40 per pair	✓	Required output is 1200 watts Space available is 1000 mm high x 750 mm wide. Approx radiator dimensions 900mm high x 600mm wide. (Taking into account space for valves)
	56.00 each	67.20 each	✓	Number of sections possible Width (600mm) divide by 45mm per section + allowance for each side. 600 - 24 divided by 46 = 12 sections.
	13.00 each	15.60 each	✓	Heat output per section Divide your required output by sections. 1200 watts divided by 12 = 100 watts per section.
	20.00 each	24.00 each	✓	Selecting your radiator section 4-750 @102 watts per section. Therefore 12 sections @102 per section = 1224 watts @ 50 degrees C delta T.
	POA	POA	✘	Price calculation 12 x 43.00 = 516.00 ex VAT, Plus feet if floor standing and any other non standard support brackets you may require.
	90.00 each	108.40 each	✘	Dimensions The nominal overall length of a radiator = number of section x 46mm = 24mm for reducing bushes (12mm each end). Subject to manufacturing tolerance of +/- 0.7mm (1.5%) per section.

Envirovent

SILENT Design 100

- Silent elastic blocks
- Sealed for life ball bearings
- Back draught shutter and airflow guide vanes
- High performance and quality
- Incredibly silent running
- Energy efficient
- 8 Watts / 230 Volts
- IP45 rated

A range of 100mm domestic axial extract fans for wall or ceiling installations, designed to solve ventilation problems in WC's and bathrooms. Fitted with motors mounted on silent elastic blocks, the fans deliver incredibly silent running and exceptional performance and stylish design.

ECO dMEV

- Up to 6 adjustable trickle speed settings
- Timer, humidity sensor and pull cord models
- Complies with Building Regulations. Part F for system 3 Continuous Mechanical Extract
- SAP Appendix Q eligible achieving a low specific fan power of 0.28 W/l/s
- Incredibly silent running - Below 20 dB(A)
- One fan for all situations, both walls and ceilings
- Low Energy DC 1.5 Watts - Low voltage version available
- 4 Interchangeable front panel trims

The ECO dMEV has been designed and developed to offer the market a constant volume, continuously running, decentralised extract fan for the lowest power consumption, the lowest noise and lowest lifecycle costs.

SILENT MV

- Sound absorbent insulation
- Incredibly silent running
- 360° rotating connection box
- Sealed for life ball bearings
- Fitted with a two speed motor
- Complies with building regulations
- High performance with flexible location
- Easy installation and maintenance
- IP44 rated

The SILENT MV fan range offers one of the most versatile fan systems on the market today. Due to its flexibility it can be used in a multitude of small and medium fan installations. Especially advantageous in applications where the system may be running for long periods throughout the day, the acoustic benefits of the SILENT MV fans ensure that optimum comfort is achieved without the disturbance of noisy ventilation systems.

SILENT 100

- Also available in silver on silent elastic blocks
- Sealed for life ball bearings
- Back draught shutter and airflow guide vanes
- High performance and quality
- Incredibly silent running
- Significant energy savings
- 8 Watts / 230 Volts or 13 Watts / 12 Volts options
- IP45 / IP57 SELV version

100mm domestic axial extract fans for wall or ceiling installations. Designed to solve ventilation problems in WC's and bathrooms. Fitted to motors mounted on silent elastic blocks, fans are incredibly silent running and exceptional performance.

Electric Underfloor Heating

There is nothing that quite matches the comfort of warm feet when getting out of the bath or shower, especially in the cold winter months! Imagine stepping onto warm tiles controlled to the temperature you prefer.

Electric underfloor heating works by gently warming the mass of floor which in turn warms the rest of the room. Our underfloor heating kit is quick and easy to install. Ideally timed when you are fitting a new kitchen or bathroom. Electrical components are covered by a two year warranty.

The Underfloor Heating Kit Includes

- The correct size heating mat.
- Digital touch screen timer and thermostat.
- Floor sensor and floor sensor mounting pipe.
- Multimeter to check installation at every stage.
- Comprehensive installation manual and control card.

Putting You in Control...

The digital touch screen, completely programmable timer and thermostatic controller enables you to fully regulate the temperature and control when the heating is on or off. The manual override means at the touch of a button the temperature can be higher or lower to suit as and when it is needed.

Additions

For the perfect finishing touch, enhance and complement your towel rail or radiator with our collection of high quality accessories and additions. From timers to aroma oil dishes, the choice is all yours.

Electric Element Only prices

Standard Element

IP55 Suitable for zones 1 and 2 of the bathroom.

Each standard element contains a preset surface temperature control along with a back up fail safe, this is the only temperature control supplied, for more flexibility over the surface temperature we recommend using our AC012 (rheostat), this will give you surface temperature modulation, when fitted into the electrical supply circuit.

Available as a summer kit for dual fuel options. See page 154 for tee piece AC003 £30.00 ex VAT, £36.00 inc VAT

Element Cable Length 1.5 MTR

Product	Watts	Price (ex VAT)	Price (inc VAT)
EE002	50w	61.00	73.20
EE002	75w	64.00	76.80
EE002	100w	101.00	121.20
EE002	125w	103.00	123.60
EE002	150w	104.00	124.80
EE002	200w	106.00	127.20
EE002	300w	107.00	128.40
EE002	400w	108.00	129.60
EE002	600w	113.00	135.60

Heat Sensor Element

PX5 suitable for zones 1 and 2 of the bathroom.

Five temperature settings ranging from 30°C to 60°C.

The device displays the temperature to which it is currently set and indicates the status of the heating cycle.

Optional accessory - Heat Sensor Element Cover Shroud - AC040, to hide the cable - RRP £13.00 (ex VAT) each. See page 154.

Can be used when depth from wall to centre is the max of 70mm.

Element Cable Length 1.5 MTR

Product	Watts	Price (ex VAT)	Price (inc VAT)
EE006	200w	182.00	218.40
EE006	300w	193.00	231.60
EE006	400w	201.00	241.20
EE006	600w	212.00	254.40
EE006	800w	221.00	265.20
EE006	1000w	234.00	280.80

Electronique Element

IP66 Suitable for zones 1 and 2 of the bathroom.

The standard Electronique element is set to a constant surface temperature of 52°C, with no need for external controls. In the fully loaded towel warming mode it will act to reduce power and save running costs. In space heating mode it will increase the power to deliver background heat needed to the maximum of its rated capacity. A safe to touch system, with safety measures incorporated.

Available as a summer kit for dual fuel options. See page 154 for tee piece AC003 £30.00 ex VAT, £36.00 inc VAT

Element Cable Length 1 MTR

Product	Watts	Price (ex VAT)	Price (inc VAT)
EE001A	200w	235.00	282.00
EE001A	400w	246.00	295.20
EE001A	600w	263.00	315.60

Remote Controlled Heat Element

IPX4 suitable for zones 1 and 2 of the bathroom.

Negative Temperature Coefficient technology

7 day programmable element with remote control switches the towel rail on and off when you want, at the temperature you want. Eco, boost and safety lock features included, and manual override allows you total flexibility when needed. Can be retro fitted to existing electric or dual fuel multirail towel warmers.

*Please note, Element only suitable for vertical installation

Available as a summer kit for dual fuel options. See page 154 for tee piece AC003 £30.00 ex VAT, £36.00 inc VAT

Element Cable Length 1.4 MTR

Product	Watts	Price (ex VAT)	Price (inc VAT)
EE005	300w	223.00	267.60
EE005	600w	226.00	271.20
EE005	900w	232.00	278.40

Contract Fixed Heat / LST Electronique Element

IP55 Suitable for zones 1 and 2 of the bathroom.

Fixed Heat is designed as an energy saving element to control temperature and consume only the correct amount of power required. It maintains your pre-set temperature whether the rail is in a cold bathroom empty or fully loaded with towels. Fixed Heat for LST (low surface temperature) of 43°C must be chosen to comply with LST legislation for use in public buildings, hospitals and care homes.

Element Cable Length 1 MTR

Product	Watts	Price (ex VAT)	Price (inc VAT)
EE001C	200w	235.00	282.00
EE001C	400w	246.00	295.20
EE001C	600w	263.00	315.60

Heating Options

Standard Rail Option (H) and (C)

Multirail Option (H) and (C)

Heating Only Options

H

Is suitable for all heating and hot water systems. For connection to either direct (open) or indirect (closed) central heating systems.

C

Suitable for indirect (closed) central heating circuits only. It cannot be installed on an open circuit due to the product containing ferrous (steel) parts.

Standard Rail Option (E)

Multirail Option (E)

Electric Only Options

E

A completely independent unit requiring only a fused spur electric connection. Thermal transfer fluid is heated by an electric element within the towel rail.

Standard Rail Option (D)

Multirail Option (D)

Dual Fuel Options

D

The towel rail has the capability to run from a central heating circuit or an electric element. Handy in the summer months when the central heating is turned off.

Internal view

Rear external view

Electric Dryline Option

DL

Electric dryline technology, with the towel warmer not containing any fluids. The towel warmer is heated using a silicone heater cable, exiting the towel warmer via a three core cable. This can then be attached to a fuse spur. Only available on specific models, please contact our sales office on +44(0)1902 387000 for further details.POA.

Please Note:

When using the electric element only (i.e., during summer), allowance must be made for thermal expansion within the product by having the 'return' radiator valve left partially open. The 'flow' radiator valve must be closed to prevent back flow through the system. Both valves should be opened and balanced when the central heating system is operative, (i.e. during winter). Steel Rails - Must be installed in accordance with BS7593 where a corrosion inhibitor is used.

Brass Rails - Caution where water softener is installed, as this could cause dezincification (material is attacked i.e. zinc eaten away by aggressive water).

Brass towel warmers are manufactured using dezincification resistant brass, however it should be understood that the term 'resistant' does not entirely preclude the possibility of dezincification occurring. If you intend to install the product on an open (DHW) circuit, make reference to your local water authority to ensure dezincification has not previously occurred. Towel warmers manufactured from brass tubing should not be installed on an open circuit if a water softener is present. Water analysis to determine the likelihood of dezincification is available at cost.

Models suitable for indirect (closed) circuits only cannot be installed on an open circuit due to the item containing ferrous (steel) parts. Product compatibility is the responsibility of the installer.

Fitted Electric & Dual Fuel prices

This section contains a range of elements with price supplements for electric and dual fuel models. Please add the price of your element to the model you choose and we will build it for you.

Standard Element IP55 Code EE002

A benchmark element to suit each size of product.

E Electric Only £201.00 ex VAT, £241.20 inc VAT

D Dual Fuel £138.00* ex VAT, £165.60 inc VAT

Electronique Element IP66 Code EE001A

Maintains surface temperature of product to 52 °C.

E Electric Only £314.00 ex VAT, £376.80 inc VAT

D Dual Fuel £259.00* ex VAT, £310.80 inc VAT

Heat Sensor Element IPX5 Code EE006**

An electronic temperature sensor control.

E Electric Only £296.00 ex VAT, £355.20 inc VAT

D Dual Fuel £244.00* ex VAT, £292.80 inc VAT

**Optional cover shroud available AC040, See page 154

Remote Controlled Heat Element IPX4 Code EE005

NTC - Negative Temperature Coefficient technology. Remote controlled programmable element for adjustable temperature control.

E Electric Only £331.00 ex VAT, £397.20 inc VAT

D Dual Fuel £269.00* ex VAT, £322.80 inc VAT

Fixed Heat / LST Electronique Element IP55 Code EE001C

Ideal for LST applications where surface temperatures need to be guaranteed.

E Electric Only £314.00 ex VAT, £376.80 inc VAT

* Dual fuel models will also be supplied with a conversion tee where applicable. This can be used with VL013 valves for a multitrail. Alternatively, to a conversion tee dual fuel valves VL015 can be used.

All the images of elements depict electric only versions. Dual fuel configurations may vary including element positioning. The appropriate standard versions will be supplied in all cases unless advised otherwise.

Electric towel warmers are filled with a glycol ethylene / water mix to strict guidelines. This improves the thermal transfer rate and acts as a corrosion inhibitor.

All electric and dual fuel towel warmers must be fitted by a qualified person.

The elements are fitted on the right hand side as standard. They can be left hand mounted on request, on certain rails only.

Dual Energy units are supplied with matching tee pieces wherever possible. Please consult with Sales to confirm suitability and pricing for your own requirements.

IP Rating and Bathroom Zones

This section contains information on electrical safety.

IEE Wiring Regulations have identified the following zones and IP ratings to ensure safety.

IP Zoning

ZONE 0	Inside the bath or shower. Any fitting here must be SELV (max 12v) and a minimum rating of IPX7. (Protection against immersion in water).
ZONE 1	Above the bath or shower to a height of 2.25m. A minimum rating of IPX4 is required * See note 1.
ZONE 2	The area stretching to 0.6m outside the bath or shower and above the bath or shower if over 2.25m. A minimum rating of IPX4 is required * See note 1.
OUTSIDE ZONES	Anywhere outside zones 0, 1, and 2. Where water jets are not used for cleaning purposes, the general rules BS7671 apply. * See note 1.

All final circuits require 30mA RCD protection.

- In zones 1 and 2 if there is a likelihood of water jets being used for cleaning purposes a minimum of IPX5 is required.
- Where ceiling heights exceed 2.25m, the zones are effectively up to 3m, beyond 3m the walls are out of scope.
- Basins are not covered, however they are usually considered zone 2.
- If the space underneath a bath cannot be accessed without tools that space is considered out of zone.
- Information contained on this page is for guidance only. Please refer to current IEE Regulations or a qualified electrician.

IP Rating Guide

The IP (ingress protection) rating given to an enclosure, states the degree of protection it offers by means of two digits. A summary of these are detailed below. For more information please see British BS EN 60529:1992, European IEC 60509:1989

First Digit

Protection against solid foreign objects and access to hazardous parts.

At the lowest of seven levels is 0, this means no protection is offered. At the highest level 6, there shall be no entry of dust particles.

Second Digit

Protection against entrance of water on a progressive scale. At level 1 dripping water shall have no effect. at level 6 water from powerful jets against the enclosure shall have no effect.

The letter X can be used in place of the first digit or second digit to indicate that tests have not been carried out or are not applicable.

0		No protection.	0		No protection.
1		Protected against solid objects larger than 50mm e.g. accidental touch by hands.	1		Protected against vertically falling drops of water e.g. condensation.
2		Protected against solid objects larger than 12.5mm e.g. fingers.	2		Protected against direct sprays of water up to 15° from the vertical.
3		Protected against solid objects larger than 2.5mm e.g. tools and cables.	3		Protected against direct sprays of water up to 60° from the vertical.
4		Protected against solid objects larger than 1mm.	4		Protected against water splashed from all directions - limited ingress permitted.
5		Protected against dust (no harmful deposits).	5		Protected against low pressure jets of water from all directions - limited ingress permitted.
6		Totally protected against dust.	6		Protected against strong jets of water e.g. for use on ship decks - limited ingress permitted.
			7		Protected against the effects of temporary immersion in water between 150mm and 1m.
			8		Protected against continuous submersion at a specified depth.

IEC 529, bs en 60529 does not apply to any risk of explosion or conditions such as humidity, corrosive gases, fungi or vermin. In certain cases equipment designed to be mounted in an enclosure will contribute towards the stated IP rating (eg Push buttons mounted in an enclosure). Different parts of enclosures can have different degrees of protection and still conform to the standard (e.g. Enclosures with pre-drilled conduit entry). All information strictly for guidance only, please refer to regulations and manufacturers for information if you are in any doubt.

Accessories

AC002
Ball vent.

Valves

Arne VL003

A modern valve that works with many designs. Available in our contemporary colour finishes.

Arne Thermostatic VL004
Controlling the heat of your towel rail or radiator.

Xero VL012

This modern tap head style suits many bathroom taps and fittings.

Piazza VL014

This cubed valve gives a great finish to our square tube products.

Combination Kit VL013

A combination kit of VL003 straight and angles valves for a dual energy option, applicable for all multirail products.

Adapta VL001

A contemporary double angled valve, almost not to be noticed.

Dual Fuel Valves VL015

For both central heating and electric dual fuel options.

Art Deco VL006

These valves work well with the hexagonal tube deco designs.

Crosshead VL008

A valve that suits most traditional designs. Our benchmark.

Crosshead 2 VL018

A capstan style valve, which suits ball jointed products.

Excelsior VL010

Thermostatic, a substantial valve in a time honoured design.

Arne Corner VL023

A discreet contemporary valve that neatly aligns with your towel warmer.

Arne Corner Thermostatic VL024

Thermostatic version of our discreet corner valves.

Brushed Copper Plate
£ POA

Please Note: Polished Brass and Polished Copper tube finishes, are supplied in a raw, un-lacquered finish, as standard. This un-lacquered (ie; unprotected) base material will discolour in a short period of time and will therefore require regular cleaning in order to maintain the finish. To add a lacquer to preserve the finish, add an additional 20% to the un-lacquered price. Brushed Brass will be supplied as a lacquered finish only and subject to an additional 20% supplement charge on top of the chrome finish price.

The supplements displayed on this page are **only** to be added to brass manufactured towel rails, please see the individual product page for full material information. Individual mild steel supplements can also be found on the product page. For more information regarding pricing contact sales on 01902 387 000.

Antique Bronze, Antique Brass & Antique Copper - Due to the reaction between the solution with the base metal there will always be a degree of natural variation in shading between different components.

General Information

Bespoke items are non-returnable. Please note that certain non-stock models are also non-returnable, please confirm with our Sales Office on telephone +44(0)1902 387000.

All heat outputs are shown at ΔT 50°C, in compliance with BSEN442 - Specification for Radiators and Convectors. To convert to ΔT 60°C, multiply heat output by conversion factor 1.264 (approximate figure), to convert to ΔT 70°C, multiply heat output by conversion factor 1.549 (approximate figure).

All measurements given are nominal Dimensions only (mm), and are not binding. Detailed technical drawings are available on request from our Sales Office on +44(0)1902 387000 or via our website - www.vogueuk.co.uk

Manufactured from hot brass stamped fittings and high quality brass tube complying to BS EN 12449:2016+A1:2019. Some models are manufactured from high grade CR steel tubing and/or containing steel components suitable for closed/indirect circuits only. All rails are pressure tested to at least 5.4 bar (78psi) up to a maximum of 13 bar (189psi) air immersed in water. All models are fitted with two ½" BSP F.I. connections. Alternative M.I. or compression fitting is available on request. ¾" BSP F.I. connections available at extra cost on some models. A manual bleed air vent is fitted to all hot water/dual fuel models. Auto air vents available on request at additional cost.

In compliance with our policy of constant improvement we reserve the right to alter specifications, materials and Dimensions or discontinue any of our products without prior notice. The colours in the brochure are as accurate as the colour printing processes allow. Photographs and images are for illustrative purposes only. We reserve the right to change specifications without prior notification.

Products ordered incorrectly or where the specification has changed will incur a re-stock charge. Bespoke/custom made products are non-refundable. Upon the return of a product Vogue (UK) Ltd reserve the right to refuse credit if the product is not made available upon an agreed collection/return in line with the Company's terms and conditions.

Electric towel warmers are filled with a glycol ethylene / water mix to strict guidelines. This improves the thermal transfer rate and acts as a corrosion inhibitor.

A copy of the Company's full Terms and Conditions of Trading is available on request.

Installation

Vogue (UK) Ltd recommends that existing or new pipework is not adjusted until the towel warmer or radiator has been delivered and is in its final position.

Pipe centres are provided as centre to centre tapings using the Vogue (UK) range of valves. Valves are NOT supplied with each product. Please see Valves & Accessories section for further details. All installations of a Vogue (UK) Ltd towel warmer or radiator should be in accordance with the following British Standards;

- BS 7593:2019 Code of Practice for the preparation, commissioning, and maintenance of domestic central heating and cooling water systems (In short, clean, protect, test & maintain).
- BS EN 14336:2004 Heating systems in buildings – Installation and commissioning of water-based heating systems
- BS EN 12828:2012 Heating systems in buildings – Design for water-based heating systems.

PLEASE NOTE: All electrical connections, including elements (see page 150), must be carried out by an accredited electrician in accordance with IET wiring regulations.

Dual Energy units are supplied with matching tee pieces wherever possible. Please consult with Sales to confirm suitability and pricing for your own requirements.

EN442.1 & 2

Where applicable product within this publication has undergone independent testing to verify heat outputs are in accordance with the parameters laid down in the above European standards.

EN60335

Household and similar electrical appliances. Safety.

Part 2 - 43 : 2003 + A2 : 2008

Where applicable all product within this publication utilising an electrical heating component, conform to the above safety standard.

ISO 9001:2015 Certified

Vogue (UK) Ltd is proud to be ISO 9001: 2015 certified.

Quality is utmost in importance to our organization, in both the products and services we provide our customers. Reflecting this commitment, Vogue (UK) Ltd implemented and received certification of our Quality Management System in accordance with ISO 9001:2015.

Construction Product Regulations (CPR)

In compliance with the above, Vogue (UK) Ltd (The company) holds declaration of Performance Certificates (DoPs) for all products covered by the Harmonised Standard EN442.1 / 2. Copies of relevant certificates are available on request. Some products at the time of print may be awaiting confirmation.

Product with a declared heat output of 200Watt or less 50 degree C Delta T are not classified by The company as heating appliances and are therefore not covered by the above. All individually manufactured bespoke products are similarly exempted from the above legislation.

Warranty

Vogue (UK) Ltd is a company that celebrates the wealth of traditional, quality handcrafted heated towel warmers and radiators and is one of the last true manufacturers in the UK. Vogue branded towel warmers installed within the UK are also covered by an extended 2, 15 or 30 Year product warranty – subject to our business trading Terms & Conditions against manufacturing defects. Components such as inset radiators, not of our manufacture, which become faulty by reason of defected materials, come with a 2 year warranty only.

Continual Improvement

Our company policy is one of continual improvement and Vogue (UK) Ltd reserves the right to amend designs, specification or discontinue any of our products without prior notice. E & OE.

Carriage

Paid UK mainland, excluding requests for next day service, Export carriage can also be arranged. Please contact our Sales Office for details on telephone +44(0)1902 387000.

Innovation

Vogue UK is a vibrant organisation with research being conducted in many technology disciplines. This research results in exciting products as evidenced throughout the design collections we offer. Vogue UK has set itself a clear objective: both through consistent preservation and long tradition of British craftsmanship and meeting its high standards, as well as creating, with its very own innovative heating developments, contemporary design and a heightened passion for detail and perfection.

Those who appreciate lasting value derived from the synergy of traditional craftsmanship, creative development and the latest technology, as well as dedication in seeking the extraordinary know not to entrust any towel rail design but rather to a design crafted from Vogue (UK).

Vogue UK emphasises its creative drive to differentiate its towel rail designs down to the finest detail and its desire to monitor, to the greatest possible extent, the development and manufacture of a hand crafted product. We use the latest technology to produce low-volume individual parts with high added value continuously offering home interiors and connoisseurs of design new, impressive towel rail models.

Environment

Vogue UK has a legacy of core values, rooted strongly in safety, health and environmental stewardship. For 30 years, we have been reducing the environmental footprint of our own operations. Today, footprint reduction is expected of all companies. The challenge – and the opportunity – are products and manufacturing processes that are safer, less toxic, more energy efficient, use less water, less energy, and produce fewer greenhouse gases.

We're working to conserve energy and reduce waste and are exploring the use of sustainable materials and products. Whether we're saving costs by reducing energy consumption or creating covetable products through innovative, sustainable design, we believe that reducing our impact on the environment can also result in positive business benefits.
